

Xedion XS 500

The Xedion XS500 modular seatbox system is modern, stylish and practical. It offers excellent stability due to the 25mm diameter round legs fitted with independent internal legs that can be used to level the box without interfering with main leg and box set up.

The top module consists of a high quality pole seat with 2 x 40mm deep storage trays and 2 x magnetic front drawers beneath.

The pull out cassette unit below features 1 x full width front magnetic drawer, 1 x 40mm deep storage tray complete with lid.

High quality safety hinged catches and soft touch leg adjusters with non marking leg system fitted throughout.

Another great feature is the independent adjustable seat height system for optimum comfort that is very important especially when fishing with a long pole.

Complete with cassette style foot plate, 2 x pole rest arms and padded carry strap.

Legs without the adjustable independent internal legs are available on request, this will lower the box set up and is favoured by many commercial anglers where the fisheries have purpose built level platforms..

Harry Billing

The Xedion XS Seatbox is the most stable box I have ever used "it is as solid as a rock" Whether I am fishing on commercials or natural venues such as Porth Reservoir. It's a true workhorse and a box that is built to last.

Xedion XS 500 Base

The Xedion XS500 Base modular seatbox system is modern, stylish and practical. It offers excellent stability due to the 25mm diameter round legs fitted with independent internal legs that can be used to level the box without interfering with main leg and box set up.

The top module consists of a high quality pole seat with 1 x 40mm deep storage tray beneath.

The pull out cassette unit below features 1 x 40mm deep storage tray complete with lid.

Individual modules can be added to build the box of your choice.

High quality safety hinged catches and soft touch leg adjusters with non marking leg system fitted throughout.

Another great feature is the independent adjustable seat height system for optimum comfort that is very important especially when fishing with a long pole.

Complete with cassette style foot plate, 2 x pole rest arms and padded carry strap.

Legs without the adjustable independent internal legs are available on request, this will lower the box set up and is favoured by many commercial anglers where the fisheries have purpose built level platforms..
