

## ZLT Shot

Manufactured in the UK, ZLT Shots and Bombs are recognised by many top anglers as the best shot on the market.

The micro lead shot size 8 – 13 are easy to use because this super soft has been cut to the ideal depth that sits centrally on the line. This is very important as it will reduce line damage and help prevent the line twisting and tangling leading to poor bait presentation.

The HD Arsley Bombs are very compact compared to many other non-toxic bombs offering enhanced bait presentation and lower resistance, improving casting capabilities when fishing at distance or when fishing rivers.

The Rummet is a new version of the plummet that has been developed by ZLT, it has a rubber jacket and a full foam base that helps prevent damage to the line and the hook when plummeting up.

## Bombs & Plummetts

MT 115	1/8oz HD Arsley Bomb
MT 116	1/4oz HD Arsley Bomb
MT 117	3/8oz HD Arsley Bomb
MT 118	1/2oz HD Arsley Bomb
MT 119	5/8oz HD Arsley Bomb
MT 120	3/4oz HD Arsley Bomb
MT 121	1oz Lead Arsley Bomb
MT 122	1 1/4oz Lead Arsley Bomb
MT 123	1 1/2oz Lead Arsley Bomb
MT 124	2oz Lead Arsley Bomb
MT 142	1/4 oz Cork Plummet
MT 143	1/2 oz Cork Plummet
MT 144	3/4 oz Cork Plummet
MT 150	1/2 oz Rummet
MT 151	3/4 oz Rummet

## HD Open End Feeder

20g – 250g

- Robust construction
- Fitted with shock Ring
- Ribbed Grip Lead
- Ideal for big fast flowing rivers such as the Trent, Severn, and the Wye when targeting Barbel, Chub and Bream.

The heavier weights ( up to 250g ) are perfect when fishing at distance or if the River is carrying water and the large holes enable the feeder to empty faster and keep the bait in a tighter area.

Perfect for feeding large amounts of Pellets, Hemp or Ground bait.

Feeder add on Lead	67713 060	60g
Feeder add on Lead	67713 080	80g
Feeder add on Lead	67713 100	100g
Feeder add on Lead	67713 120	120g
Feeder add on Lead	67713 140	140g
Feeder add on Lead	67713 160	160g
Feeder add on Lead	67713 180	180g
Feeder add on Lead	67713 200	200g
Feeder add on Lead	67713 250	250g

## Long Cast Feeder

The Long Cast Feeder has been designed to cast long distances with a high degree of accuracy.

The lead ring weight is fixed to the base of the feeder giving it a weight forward position when casting much the same as a dart.

Due to its design it can be filled in exactly the same way as any open feeder and can also be used as a Pole Feeder.
