

Manic Carp Fishmeal

This groundbait contains a high proportion of fishmeal which is a powerful attractor, not only for carp but other fish such as tench and bream. In shallow waters this fine groundbait can be fed either mixed sloppy or very dry, to form an attractive cloud in the water. This versatile ground bait can also be mixed to form a heavier mix for deeper swims.

Halibait Expander Pellets

High quality pellet that can be quickly transformed into the perfect soft sinking pellet using the Manic Impact Genius Bait Station at home or on the bank.

The close fibre texture forms a soft pellet that is easy to prepare and will stay on the hook and can be used as feed or hook pellets.

If you wish to colour or flavour the pellets just add them to the water prior to pumping. Halibait Expander Pellets can also be fed as floating pellets when surface fishing straight from the bag.

To prepare Expander Pellets follow the instructions on the Manic Impact Genius Bait Station

24902 706 Expander Pellet 4mm 400g bag
24902 708 Expander Pellet 6mm 400g bag

Halibait Hard Feed Pellets

Halibait hard feed coarse pellets are produced using the best quality fish friendly ingredients that attract and hold fish in your swim for long periods. They can be used for loose feed or as a hookbait as a banded pellet using the F1Micro bands with the Banded a Bait tool.

Paste made from Halibait Ground bait can be wrapped around the banded pellet when targeting bigger fish such as Carp, Barbel and Tench. Halibait Expander pellets fished over a bed of Halibait Hard Feed pellets works well if a soft hookbait is required.

Ideal for all types of Coarse fish.

24902 801 Hard Feed Pellet 4mm 800g bag
24902 802 Hard Feed Pellet 6mm 800g bag
24902 803 Hard Feed Pellet 8mm 800g bag

Halibait Ground bait

The same winning fishmeal formula has been used to create this easy to use pellet based ground bait that can also be used to make paste.

Mixing instructions:
Semi dry mix

For shallow water and ground bait feeder add a small amount of water to the dry ground bait until it holds together when squeezed
Note - All mixes will benefit from being pushed through a riddle after mixing to give you the perfect texture.

Paste:

Add more water in small amounts until you form a paste to the texture you require.
The more water you add the softer the paste!
