

F1 MICRO BAND

F1 Micro Bands

The very small versatile F1 Micro Band when used in conjunction with the Band a Bait has revolutionised hair rigging bait. Not only can you now band 3 – 12mm pellets on the same band it is now possible to present an endless variety of baits including Magic Bread, soft pellets, corn, worms, maggots etc, etc, etc. All on the same rig!

These bands disappear into the surface of the pellet after a few minutes in the water offering perfect presentation in the same way as the lasso method but without all the hassle!

Band a Bait Pellet bands S - M - L

These new style bands differ from the standard soft latex band; they are clear and slightly thicker.

They have been designed for use with larger softer delicate baits such as Mussels and prawns etc.

Another advantage they have over the slimmer bands is that they can be used to secure pre drilled pellets on the hair by pulling the band into the pre drilled hole or used to band pellets in the normal way but with a much firmer grip.

72312 101	Band a Bait Tool	
72312 105	F1 Micro Bands	1.5mm
72312 110	Pellet Bands (S)	3mm
72312 120	Pellet Bands (M)	4mm
72312 130	Pellet Bands (L)	6mm

BANDABAIT

specialist bait banding tool

The Band a Bait tool has been widely accepted by many top anglers to be one of the best products ever to hit the fishing market.

Not only has it improved the ability to band pellets without any fuss in seconds it has opened doors for anglers, some with disabilities who previously just found it impossible.

For many years some anglers have avoided fishing banded pellets because of the hassle of inserting pellets into bait bands especially when your hands are wet.

Anglers from the average pleasure angler to top flight match and international anglers have realised the many benefits the Mosella Band a Bait provides with such a simple solution to banding pellets.

The combination of the Mosella Band a Bait with the F1 Micro bands eliminates all these problems in seconds; you can now attach pellets from 3mm to 12mm using the same band.

This also has the advantage of gripping the pellet firmly in the band keeping it in place even when playing the fish; it is possible to catch more than one fish on the same pellet.
